Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)					
	10/523,853	KOSAKA, HIDEKO					
Office Action Summary	Examiner	Art Unit					
	Lore Ramillano	1743					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

ing a said Nasar

#### **DETAILED ACTION**

Applicant's election without traverse of **Group I, claims 1-9,** in the reply filed on 2/13/06 is acknowledged. Thus, claims 10-18 are withdrawn and claims 1-9 are pending in the application.

#### Claim Interpretation

As to **claims 1-9**, which contain intended use terms, the Examiner will interpret these claims in light of the structural elements that are disclosed and not for their intended use as stated after the terms "for," and "used for." The terms, "for," and "used for" are intended use terms. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

The Examiner has applied references, which are capable of meeting these functions. A structure, which is capable of providing the intended use, is considered to meet the limitation of intended use recited in a claim to a device or an apparatus.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

<sup>(</sup>b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1743

2. Claims 1-4, 6, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lau (US 5049358).

Lau discloses a test piece that quantifies a protein in a test sample (Abstract).

The test device includes a pH indicator, such as tetrabromophenol blue (Table I), and a polymerizable urethane-containing composition (Abstract), which includes a cationic or nonionic surfactant (column 14, lines 34-41).

### Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 5, 7, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lau in view of Iwata et al. (US 5565363).

Page 4

Art Unit: 1743

Lau does not specifically disclose the following compounds: hexadecyltrimethylammonium ("CTAB"), and polyethylene glycol as the surfactants in the test piece.

Iwata et al. disclose cationic surfactants, which comprise CTAB (Table 1), and nonionic surfactants, which comprise polyethylene glycol (Example 10), which are used as sensitizers with pH indicators.

Lau discloses the claimed invention except for having the following compounds:

CTAB and polyethylene glycol. Thus, it would have been obvious to one having

ordinary skill in the art at the time the invention was made to modify Lau to provide the

specific surfactants because Iwata et al. teach that these surfactants are known to be

sensitizers for pH indicators.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lore Ramillano whose telephone number is (571) 272-7420. The examiner can normally be reached on Mon. to Fri. 8:30a to 5:00p.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
